

Kernel Conference

AUSTRALIA 2009

Do you want to meet the brains behind some of the most innovative, groundbreaking and useful features in **Open Source operating systems**? Have you ever wondered what it takes to make useful features or technologies appear in different operating systems?

Some of the finest minds in Open Source operating systems are coming to Brisbane for the first **Kernel Conference Australia** - come and hear them talk about what they're working on, learn about other operating systems' features, and be inspired to contribute.

Kernel Conference Australia is a **Kernel-focused technical conference** to be held in Brisbane, Australia, from July 15th to 17th, 2009. Any and all Open Source kernels and the technologies within those kernels are open for discussion.

Who is speaking?

- Jeff Bonwick and Bill Moore – inventors of ZFS, Sun's revolutionary filesystem
- Max Alt – Intel's Open Source community manager
- Sherry Moore – Sun's x64 project lead
- Gavin Maltby – Sun's Fault Management Architecture lead

Who should attend?

- Anybody who wants to learn how their operating system *really* works
- Developers
- System Administrators
- Researchers and Students

What: **Kernel Conference Australia 2009**
When: **July 15th – 17th, 2009**
Where: Queensland Brain Institute, University of Queensland
Website: <http://au.sun.com/sunnews/events/2009/kernel>
Call for Papers: <http://au.sun.com/sunnews/events/2009/kernel/paper.jsp>

For more details contact:

James McPherson	jmcp@Sun.COM	+61 7 3238 8358
Claire Operie	Claire.Operie@Sun.COM	+61 2 9844 5275
Gabriele De Celis	Gabriele.DeCelis@Sun.COM	+61 2 9498 0498

Registration opens on Monday 4 May 2009.
